THE STUDY OF OLEFINES. REPT. 6. THE DEHALOGENATION OF ALKYL HALIDES: THE HEAT DECOMPOSITION OF BORIC ESTER. [31 Oct 62] [8p]
Order from SLA \$1.10 TT-64-14355

Trans. of Kogyo Kagaku Zasshi (Japan) 1952, v. 55,
p. 589-591. (Abstract available)

DESCRIPTORS: *Alkenes, Synthesis (Chemistry),
Halides, *Bromides, *Chlorides, *Boric acids,
Esters, Pyrolysis, Molecular Isomerism.

In dehalogenating primary alkyl bromides and chlorides
the product collected is mainly aolefine and some
yolefine by-product is obtained. In the synthesis of
dehalogenated compounds from primary alkyl bromides
and chlorides, alcoholic potash or NaOH in an alcoholic
solution will only give poor results. However, when
catalyst such as PbO, CaO, or pyridine is used excel-
(Chemistry--Organic, TT, v. 11, no. 11) (over)
